Q1

Long Text

Summarised contents/sentiment:

Please go with option 1 for Whanganui transport - full implementation asap. Te Ngaru has shown a GOOD bus service will get used. In our house, everyone has a bee card and everyone uses the bus when they can. Even the dog can use it, its a fantastic service because of the frequency. Please don't let the grumpy old men who can afford car transport to undermine this progress.

Q1

Long Text

Summarised contents/sentiment:

The strategic framework presented shows a holistic and sensible vision for this (and any region) in New Zealand. However, reducing greenhouse gas emissions in our region isn't part of the vision. Although, I appreciate that the council wants to 'build resilience to the impact of climate change' it should be equally important to get to the root cause of climate change and commit to reducing emissions. Otherwise the public might think Horizon's has given up on doing their bit and why should the general public even try to do their bit then.

Long Text

Q16 Which option do you prefer?

Multi Choice

Option 1 (council's preferred option): Changing fee structure for water meters to 100% user pays.

Q17 Summarised comments/sentiment:

Long Text

That is just fair as I am sure the funding for Science can be used in a better way than paying for water meters. If the cost of those meters is a threat to the productivity of a business then there should be government funding to pay out on a case-by-case basis.

Q18 Summarised comments/sentiment:

Long Text

Q19 Give us your thoughts:

Long Text

In general I would like to see incentives for businesses that have proven to reduce their climate change emissions and environmental impact and penalties for big corporations that are reluctant to do their bit and putting pressure on our resources and climate. There needs to be a cost for businesses to pollute, otherwise the rate-payer will eventually have to pay for it.

Q13

Long Text

Which option do you prefer?

Q14

Option 1 (council's preferred option): New and improved regional services.

Multi Choice

Summarised comments/sentiment:

Q15

Option 1 does not go far enough. Whanganui is the second largest city in the region and no consideration has been made as regards improvements to passenger travel between it and Palmerston North and points further south. The present arrangements are bus only with many stops enroute. Horizons needs to look to the future as to whether a rail car type service direct to Palmerston North, connecting with the planned additional services of the Capital

Long Text

Connection might be a quicker and more environmentally better means of moving people around the region and beyond towards Wellington. Rail services such as what I have proposed are nothing new here. Kiwi Rail however has had blinkered approach to passenger rail for too long. This LTP is for the next 10 years at least. Steps towards using rail for passenger travel need to start now. Perhaps in 10 years time there might actually be a train service.

Summarised contents/sentiment:**Q1**

Long Text

Yes please get us at least a commuter bus from Marton to Whanganui like Marton has with PN. It is vital for our young people who are looking for work. Without this link, young people in particular are not readily able to travel cost-effectively.

Another possibility could be a shorter commuter bus between Marton and PN or Marton and WAG which is available on Saturdays for leisure: eg high school students who wish to go shopping or to the movies. Say 10am to 4pm on the second Saturday of each month, or something like that.

Q1

Long Text

Summarised contents/sentiment:

Visions need to have realistic goals that are able to be prioritised to what is important for the community, both urban and rural. These goals need to be sense checked that they are still applicable by the community and of priority. A lot has changed and will change, the priorities of the strategic plan are no longer fit for purpose, and are not a good use of ratepayers money.

Which option do you prefer?

Q2

Multi Choice

Option 1: Targeted mapping on acute urban growth pressure areas only.

Summarised comments/sentiment:

Q3

Long Text

LUC classes of land should guide this mapping and small parcel of land under 5ha circa may sit on productive land but are not and will never be returned to productive land use, lifestyle blocks should be able to be reduced in size for urban development whilst keeping a rural aspect. Reduce the size of lifestyle blocks to assist with accommodation of more houses.

Which option do you prefer?

Q4

Multi Choice

Option 2: Do not fund work programme for integrated catchment management.

Summarised comments/sentiment:

Q5

Long Text

You know the work that needs doing, just put funds towards that and not more consultation and planning. Get the work done that is already required and overdue before undertaking more planning. Get some more deliverables completed.

Which option do you prefer?

Q6

Multi Choice

Option 4: No change in insurance level cover, covers inflation and revaluations only.

Summarised comments/sentiment:

Q7

Long Text

Which option do you prefer?

Q8

Multi Choice

Option 3: A target of 110 kilometres of fencing and 240,000 plants plus two staff members.

Summarised comments/sentiment:

Q9

Long Text

As a community we all benefit from more investment in protecting our erodible soils and waterways.

Which option do you prefer?

Q10

Multi Choice

Option 3: Remain with current service levels.

Summarised comments/sentiment:

Q11

Long Text

There is not the need for an increase in the service provided. There are many other priorities that need attention before this.

Which option do you prefer?

Q12

Multi Choice

Option 2: Levin-only public transport services.

Summarised comments/sentiment:

Q13

Long Text

Reduce public transport offering over all services, it is costly, used by a small portion of the ratepayers and is over capitalised for our population and use.

Q14 Which option do you prefer?

Multi Choice Option 2: New and improved regional services (smaller scale)

Q15 Summarised comments/sentiment:

Long Text Neither option, as stated before, capital heavy, low requirement, it may be the "cool" thing to do but it is not essential. We need Horizons to focus on the essential areas and return work that is going to benefit the wider community. It would be cheaper to buy people bikes. Be brave make the decisions that we need you to make.

Q16 Which option do you prefer?

Multi Choice Option 1 (council's preferred option): Changing fee structure for water meters to 100% user pays.

Q17 Summarised comments/sentiment:

Long Text User pays is fair.

Q18 Summarised comments/sentiment:

Long Text There are concerns with your Significance and engagement policy and this passes the majority decision making without consultation to Horizons staff. I do not support this change and have concerns that this can be controlled by staff with certain agenda's that may not represent community or be the "best" approach. Investment revenue should be returned as the 2021 policy as that is how the funds were gained in the first instance. Drainage schemes proposal I support moving to the 90:10 funding.

Q19 Give us your thoughts:

Long Text I do not support you change of rating structure to lower the UAGC and fund more of the income from the general rate. It should be the other way around, more of the rates from the UAGS as this is based on a location and a property (people). Increasing the portion of rates on to the general rate is an approach of popularity and not reason. Property may be charged rates, but it is the people who live on them that pay them. If in doubt more user pays system is a fair approach. Though we have been having these debate for over 30 years and not much changes in the thinking.

Q1

Long Text

Summarised contents/sentiment:

Submission regarding options outlined for NPS for Highly Productive Land

Q2

Multi Choice

Which option do you prefer?

Option 3: Targeted mapping focussing on land surrounding all existing urban areas (cities, towns, villages).

Q3

Long Text

Summarised comments/sentiment:

Option 3 spread over 2-3 rating years with emphasis as per Option 2 in the first year.
This approach would ensure that all productive land in the region that may be offered for other use in the future is clearly identified and land owners know the status of such land sooner rather than later.
The funds obtained through rating for this project are separately accounted for in the years they are obtained and do NOT become part of the overall general rating funds ongoing.

Which option do you prefer?

Q4

Multi Choice

Option 1 (council's preferred option): Fund work programme for integrated catchment management.

Summarised comments/sentiment:

Q5

Long Text

Require that funding is separately accounted for and the work programme and its outcomes are reported back to the community.

Which option do you prefer?

Q6

Multi Choice

Option 1 (council's preferred option): Include baseline inflation, revaluations, claim up to \$200 million per event by Horizons and up to \$500 million alongside other councils.

Summarised comments/sentiment:

Q7

Long Text

Provided the majority of costs were apportioned to ratepayers living in the most vulnerable areas - e.g. flood plains - this would ensure council assets are adequately covered. As I chose to live in a low risk area when moving into the district I do not expect to have to carry the financial burden for those not making similar choices.
I also expect the Council to have a strategic plan for ongoing relocation and/or protection of essential assets in an effort to lower the risk to ratepayers.

Which option do you prefer?

Q8

Multi Choice

Option 1 (council's preferred option): Return to baseline levels of service and budget 30 kilometres of fencing and 70,000 plants.

Summarised comments/sentiment:

Q9

Long Text

Sadly this is one area Council can still achieve some gains without burdening ratepayers further

Which option do you prefer?

Q10

Multi Choice

Option 2: Whanganui public transport improvements staged, full implementation by 2028-29.

Summarised comments/sentiment:

Q11

Long Text

The current level of service in Whanganui for the majority of suburbs is frankly appalling and does need to improve, particularly given an aging population that will have a greater need for public transport options. I do not see any evidence of various methods of providing an efficient and effective service being investigated - for example the shuttle service provided in Tawa in Wellington - virtually an on-demand service that is in high demand and very successful for both clients and the service provider.
I need to see more options to determine what is the best funding option for ratepayers to agree to - I cannot currently see any evidence of these investigations.

Q12	Which option do you prefer?
Multi Choice	Option 1 (council's preferred option): Wider Horowhenua district, including Levin.
Q13	Summarised comments/sentiment:
Long Text	An area with an aging population that needs far more options for public transport, especially to other parts of the region and on to Wellington
Q14	Which option do you prefer?
Multi Choice	Option 2: New and improved regional services (smaller scale)
Q15	Summarised comments/sentiment:
Long Text	Concentrate funding to improving local services first then to regional services
Q16	Which option do you prefer?
Multi Choice	Option 1 (council's preferred option): Changing fee structure for water meters to 100% user pays.
Q17	Summarised comments/sentiment:
Long Text	User pays is an essential part of any sound financial model
Q18	Summarised comments/sentiment:
Long Text	THE outline provided show sound reasoning behind the policy changes proposed.
Q19	Give us your thoughts:
Long Text	It is a large and diverse area that the Council has to address and it is comforting to note that a "one size fits all" approach has not been taken in policy development. I have attended a meeting where policy was outlined and I found this very informative. Please ensure you hold more of these.

4 April 2024

Support from Mike Thompson for the Land Search and Rescue NZ submission to the Horizons Regional Council Long-Term Plan 2024-34. By Horizons providing financial support to the seven Land Search and Rescue groups in the Horizons region. With the purpose for assistance with equipment, training and other operational expenses over and above what the national organisation can currently provide.

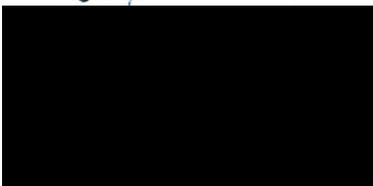

The seven groups resident in the Horizons region have needs for equipment, training and operational expenses over and above what the national Land Search and Rescue organisation can provide. The additional support and security through a Horizons Regional Council contribution will in return support the work of local volunteers in their communities and strengthen the safety net these community-based volunteers provide. The funding will be used to support the local group and local members at a local community level.

It is costly to safely equip and train a Land Search and Rescue volunteer ready for field operations. Additionally Land Search and Rescue volunteers support the lead agency (Police or Rescue Coordination Centre) with an incident management capability. This includes a range of costly technology and equipment (i.e. computers, scanners, printers, data projectors, communication equipment, mapping software etc....).

Providing support to young, old and vulnerable people in our communities through the Safer Walking and Wandersearch programs also requires specialist equipment and resources and in return provides assurance and care in our communities.

There is an acknowledgement that Horizons Regional Council faces many challenges in a post Covid environment. A modest contribution from ratepayers will support the efforts of community-based emergency services volunteers, it will support the provision of a safety net and continue to generate positive and tangible benefits for our communities, residents and visitors.

Best regards

Mike Thompson

Q17	Summarised comments/sentiment:
Long Text	
Q18	Summarised comments/sentiment:
Long Text	A uniform charge is easiest but if people choose to live i or farm in risk areas then protection should be their expense.
Q19	Give us your thoughts:
Long Text	<p>1. I am concerned about the large amount of plastic waste discarded on the roadside that gets mowed into small shards by contractors clearing the grass on roadsides. This microplastic waste is then accelerated into waterways and then to the sea. Waste must be picked up before mowing verges. This should be part of the mowing contract. It is not only plastic of course, we see household waste, fridges, microwaves, car parts and takeaway wrapping and bottles all discarded by lazy urban dwellers, or by households who cannot afford to pay for disposal.</p> <p>2. Waste disposal is a fundamental role of local councils and should be covered by rates payment, not as an extra. Just to add insult to this we see multiple private companies providing disposal service to the same location on the same day as council service. This multiplies the transport cost, fuel and greenhouse gas emissions. We should have one pickup per period by one truck not as many as four on same day.</p> <p>3. Clean water supply seems to be a problem everywhere, especially in large towns and cities, yet we see no action on making it mandatory to install rain water collection tanks in new house builds or to encourage or subsidise retro fitting to existing housing. This is something every council should be addressing.</p> <p>4. Wastewater disposal needs to be sorted urgently as the rivers and waterways continue to decline in quality. Councils everywhere have been talking about this for years yet we seldom see significant action to protect our environment. Water-clean and dirty -must be the highest priority above all other things. We can't undo the damage to nature and environment.</p> <p>5. Our rural roading network is a mess that hasn't been dealt with in spite of talking about it for years. We need to sort the north to south and east to west roading around Palmerston city and other affected villages. Links from SH1, SH3 and SH57 need to be properly linked to the new Hawkes Bay crossing replacing the old Gorge road. A standout failure in this issue is not having a second road crossing on the river close to the city. It is just dumb to have milk tankers, army tanks and stock trucks driving through the city streets on city roads too narrow, past schools.</p>

Proposal for New Bus Service to Whanganui Airport

Executive Summary:

We propose the establishment of a new bus service to cater to the growing needs of travellers to and from Whanganui Airport. With approximately 150 people utilizing the airport facilities each day, including a significant number of students from NZICPA, there exists a clear demand for reliable transportation. Our proposed service aims to accommodate this demand efficiently, providing convenient one-hour intervals between buses while also extending its reach to serve the wider Whanganui community.

Introduction:

Whanganui Airport serves as a crucial gateway for both travellers and students, with the New Zealand International Commercial Pilot Academy (NZICPA) contributing substantially to the passenger traffic. As Air Chathams increases its aircraft size and seating capacity, the need for reliable transportation becomes ever more pressing. Our proposed bus service seeks to address this need comprehensively, ensuring seamless connectivity between the airport and surrounding areas.

Key Features of the Proposed Service:

1. Frequency and Timing:

- The bus service would hopefully operate at half-hour or one-hour intervals, ensuring passengers have convenient options throughout the day.
- This frequency is designed to accommodate the diverse schedules of both regular travellers and students attending NZICPA.

2. Target Audience:

- With approximately 132 students expected at NZICPA, we anticipate a significant portion of our daily ridership to comprise students traveling to and from the academy.
- Additionally, the service caters to other travellers, airport staff, and residents of Whanganui requiring transportation to the airport.

3. Route Coverage:

- Our service will not only connect the airport but also extend its reach to cover key areas within Whanganui i.e. a bus service for Putiki which it currently does not have.

- By serving the broader community, the aim is to enhance accessibility to the airport for residents and visitors alike.

4. Adaptability to Growth:

- As Air Chathams expands its operations, hopefully the service is prepared to accommodate the anticipated increase in passenger traffic.

Benefits to Stakeholders:

1. Convenience: Passengers will benefit from a reliable and frequent bus service, eliminating the hassle of coordinating individual transportation to the airport.

2. Accessibility: Residents of Whanganui will have improved access to air travel, fostering economic development and tourism in the region.

3. Efficiency: By reducing reliance on private vehicles, the service contributes to environmental sustainability and traffic congestion management.

4. Support for Education: NZICPA students will have a dependable means of commuting between the academy and the airport, facilitating their educational pursuits.

Conclusion:

In conclusion, the proposed bus service to Whanganui Airport represents a vital step towards enhancing connectivity and accessibility for travellers and residents alike. By offering a reliable and convenient transportation option, we aim to meet the evolving needs of the community while supporting the growth and development of Whanganui Airport as a key regional hub.

We look forward to the opportunity to collaborate with stakeholders to bring this vision to fruition and improve transportation infrastructure in the Whanganui region.

Q15 Summarised comments/sentiment:

Long Text

Q16 Which option do you prefer?

Multi Choice

Option 1 (council's preferred option): Changing fee structure for water meters to 100% user pays.

Q17 Summarised comments/sentiment:

Long Text

Consent holders that meet the threshold for water metering are large scale users of an increasingly scarce public resource. It is only fair that they cover the costs of inspecting, maintaining, and monitoring their meters.

It would be unfair to expect ratepayers to cover the costs of a privileged few that are already using public resources to device a private profit.

Summarised comments/sentiment:

Q9

Long Text

Our lowland regions have some of the worst water quality in the country. This must be addressed. What was not clear to me in the consultation document was whether we are on track to meet the national standards for freshwater quality. Looking at <https://www.lawa.org.nz/explore-data/manawatū-whanganui-region/river-quality/manawatū/manawatū-at-teachers-college/>, for example, the Manawatū at Teachers College is rated 'E' (bottom) for e coli, and deteriorating. Most other indicators are also showing a negative trend.

I am fortunate to live in the Nguturoa Stream Catchment study area, there is heaps of fencing and planting going on and long-term data collection, I would like to see this kind of work expanded.

Transport Option One is my preference.

Limited transport currently Whanganui to Palmerston unless you like a go early and return late in the day. Not suitable for shopping as too early and too long.

Would be great to have direct bus connection to Waikanae to get train into Wellington. Currently all Intercity buses go via Palmerston North and there often a 30-60 minute wait time there. 5 hours to Wellington!

I am VERY concerned at the invasion of Phragmites karka in our waterways and on farmland. This is a plant that can very easily destroy huge tracks of infrastructure at an alarming rate and is already causing havoc to the management of some waterways....ask your water engineer. To date Horizons has buried its head but they need to wake up very very quickly. It is appalling that Horizons did not act when the issue was so much smaller but they MUST act now. To start with, designate the plant a noxious weed and notifiable.

I am also concerned that Horizons officers do not enforce consent conditions attached to earth works by developers, resulting in silt from the works damaging waterways. Why? The damage to streams and the Manawatu is huge and the aquatic life severely compromised.

I live in Whanganui and (currently) work remotely to a Wellington job. I go to wellington occasionally for work. But often due to things like transport costs, Wgtn parking costs and 4 hours on an intercity bus it is not feasible. This has

an effect on job security. Additionally, Taking the capital connection once daily service means getting up at 4.30 am and arranging tjings like childcare the night before. It gets frustratingly given ive lived in other countries where reliable, frequent fast rail means a two hour journey is doable. For me, and possibly many like me, a regular regional transport option would be a game changer in terms of ability to commute to work, or effectively work hybrid roles inter regionally, bringing economic benefits to the regions. Pkease please sort the transport!

Q16 Which option do you prefer?

Multi Choice

Option 1 (council's preferred option): Changing fee structure for water meters to 100% user pays.
